Re: Power Integrations v. Fairchild Semiconductor et al. (CA 04-1371 JJF)

Dear Howard:

In further reply to your letter of December 21, 2007, please find enclosed schematics for the FSQ0170RNA, FSQ100, FSQ211 and FAN7602B products. As indicated in the declaration of Dr. Choi, filed with Fairchild's brief in opposition to Power Integrations' motion for permanent injunction, those products include the same soft start circuitry as the design around FSQ0365RN and FSQ510 products and are significantly different from the Fairchild accused products found to infringe by the jury. As further stated in that declaration, and shown in the datasheets, none of those products include any EMI reduction circuitry or any method or technique for reducing EMI. In its opposition brief, Fairchild conceded that the FSDM101 product (which Fairchild no longer produces) is colorably similar to the Green FPS products accused at trial but at the same time, Fairchild has issued an End of Life notice for this product and is no longer selling it.

Sincerely,

Vickie L. Feeman
